AN IMPORTANT NEW BOOK

Published by . . . THE TRANSPORTATION CENTER  
at Northwestern University  
Evanston . Illinois

TECHNOLOGICAL CHANGE

AND THE FUTURE OF THE RAILWAYS . . . 239pp . . . \$4.00

What is the future of the nation's railways?

In an effort to reach a realistic appraisal of the question, some of the world's foremost authorities in industry, universities and government joined together at a conference sponsored by the Transportation Center at Northwestern University, January 23-25, 1961.

The published proceedings of the conference -- containing 16 selected papers which attempt to resolve this challenging question and point the direction for a dynamic future -- are now available from the Transportation Center.

The papers, covering technological aspects of finance, labor, government regulation, engineering, administration, economics and sociology, isolate the important factors inhibiting the full use of railway technology and give concrete proposals for overcoming these factors in the future.

To obtain your copy, fill our and return the form below to: The Transportation Center, PUBLICATIONS, 1804 Hinman Avenue, Evanston, Illinois.

## **INTRODUCTION**

THE TRANSPORTATION CENTER at Northwestern University began its formal program in the autumn of 1956. Since then it has assumed progressively greater importance as a national center for education, basic research, and service to the transportation industry and the nation.

THE CENTER'S RESEARCH PROGRAM is planned to provide a better understanding of transportation, its relationship to the economy, and its contribution to national economic growth. In pursuing these objectives, the research program draws upon authorities in various sciences at Northwestern University as well as other institutions throughout the nation.

THE EDUCATIONAL PROGRAM is concerned with encouraging outstanding scholars at Northwestern and other universities to apply their disciplines to the field of transportation. In addition to the academic program, the Center presents the results of university research and the principles of various disciplines to executives in the industry through a series of short courses and conferences.

ACTIVITIES OF THE TRANSPORTATION CENTER are guided by a national Advisory Committee of business and community leaders. Over 100 companies in air, highway, oil, pipeline, rail, water transportation, and general business contribute to the support of the Transportation Center.

# CURRENT LITERATURE in TRAFFIC and TRANSPORTATION

Compiled by **The Library of  
The Transportation Center**

Current Literature is compiled from acquisitions of the Transportation Center Library which houses one of the world's largest collections of material in traffic and transportation. Each issue includes important material from over 900 periodicals (both foreign and domestic), books, research reports and government documents.

All materials listed herein may be obtained from the author or source indicated in the ADDRESS APPENDIX which appears on the last pages of each issue - OR are available on LOAN from or for USE at the Transportation Center Library, 1810 Hinman Avenue - Evanston, Ill. PHONE: UNiversity 9-1800.

LIBRARIAN - Marianne Yates

MANAGING EDITOR - Rheba Crane

---

Published bi-weekly by the Transportation Center at Northwestern University, Evanston, Illinois. Subscription price per year: U.S., \$3.00 - Foreign, \$3.25. Review copies FREE.

## AN IMPORTANT NEW BOOK

Published by . . . THE TRANSPORTATION CENTER  
at Northwestern University  
Evanston . Illinois

### **SURVEY OF TRANSPORTATION EDUCATION in AMERICAN COLLEGES and UNIVERSITIES**

The results of a comprehensive survey of transportation education programs in American colleges and universities has been published in book form and is now available from the Transportation Center at Northwestern University.

Over 2,000 institutions of higher education were included in the survey. The book gives approximately 220 descriptive programs which vary from an institute or school of transportation to a single course in a department.

The survey was made specifically to help vocational guidance counselors in high schools - graduate counselors in colleges and universities - and personnel and training directors in transportation and general industries decide WHAT and WHERE the best transportation educational opportunities for their specific needs were.

To obtain a copy fill out and return the form below to: The Transportation Center, PUBLICATIONS, 1804 Hinman Avenue, Evanston, Illinois.
